

Policy recommendations to unleash the power of circularity of materials

Åsa Stenmarck,
IVL Swedish Environmental Research Institute

NewInnoNet

The Near-Zero European Waste
Innovation Network

More room for demonstration of innovative approaches.

The right pricing for raw materials.

Design for circularity needs incentives.

Dissemination and implementation of good practices in combination with the enforcement of legislation should receive more focus.

Monitoring and traceability of materials

The full version of the policy brief will be published on <http://www.newinnonet.eu/> by July 2017
